

GREENCheck

Resource Efficiency Health Check

GREENCheck is recommended for businesses new to Resource Efficiency and is designed as an initial Resource Efficiency assessment of your business. The **Standard Package** is recommended for any business that has utility bills (Energy, Water, Waste) **less than €200,000 per annum**. Our **Enhanced Package** is recommended for businesses that have utility bills in **excess of €200,000 per annum**.

The GREENCheck Standard Service includes:

- Benchmarking – Energy, Water, and Waste
- Electricity Analysis – where a MCC10/Quarter Hour meter is in place
- Carbon Footprint Analysis – Scope 1 & 2
- Site Visit and operational review
- Overall report and cost saving recommendations
- Grant Aid and Financial Support Review
- 6 months email/phone support from GTC

The GREENCheck Enhanced Service includes;

- The Standard Package
- Return visit to present/review the report and develop an action plan

The first step for any Resource Efficiency programme is to identify the opportunities, and their scale, within each business. A **GREENCheck** review does this and includes a report with opportunities outlined.

At this point we may also make a next step engagement proposal with GTC. We assess what we feel will best suit your needs and business and put forward a proposal.

This could be a Resource Efficiency membership package or a deeper engagement if we feel we could give extra value to your business. Having the **GREENCheck** review report to hand will enable you to decide on your next step.

Your only initial commitment is to a **GREENCheck** review. Any further engagement will be your decision.

Cost

A **GREENCheck Standard** Service costs €1,250 plus VAT (*Plus overnight accommodation and subsistence if required*)

A **GREENCheck Enhanced** Service costs €1,500 plus VAT (*Plus overnight accommodation and subsistence if required*)

What areas will we assess?

The key areas we will look at include;

Energy

- Energy Consumption – Electricity and Thermal
- Lighting Upgrade Assessment
- Major Equipment Assessment
- Grant Aid & Financial support opportunities

Waste

- Current Waste Management activities
- Food Waste minimisation opportunities

Water

- Current Water Management activities
- Departmental opportunities

A key focus during the site visit is to identify immediate no cost savings opportunities for the business.

What Actions do you need to do?

Prior to Site Visit

- Provide property information to support benchmarking
- Provide prior years utility invoices (Energy, Waste, Water)
- Provide copies of most recent utility bills
- List all Energy, Water, Waste development/project activities implemented and planned

During Site Visit

- Provide access to all parts of the building and plant – front and back of house
- Provide any information requested to be available

A site visit generally takes approximately a half day, and, for a hotel, includes an overnight stay to enable a holistic overview.

GREENCheck Output

- Overall review with recommendations and 6 months support
- Benchmark review and performance assessment
- Energy consumption review with specific electricity analysis
- Property Carbon Footprint
- Ongoing support proposal
- Enhanced - Follow on site visit and meeting to develop an action plan
